

## "Jesus in Control" Boat

Did you ever feel really scared and didn't know what to do? Jesus friends felt that way when the huge storm came up as they tried to cross the lake of Galilee. Jesus has promised to always be with us so when things seem out of control we can ask Him to help us. Make this little boat and see how it floats even if you blow up a storm. Maybe everyone on your family could make boats and you could race them.

You will need:

- Thick kitchen sponge
- Plastic drinking straws
- Craft foam or coloured cardboard
- Scissors

Instructions:

- Cut the sponge into whatever shape you would like your boat to be
- Using scissors, make a hole in the middle of your shape.
- Push a drinking straw into the hole
- Cut a triangle out of craft foam or cardboard to make a sail
- Cut 2 slits so it can fit over the straw mast
- Your boat is now ready to sail!
